01 PROFILE

Web developer. I build fast brochure websites for local businesses in plain HTML, CSS and JavaScript, and I run my own Ubuntu server with Docker for the automations I use daily. Before writing code for a living I spent five years answering people under pressure, on restaurant floors and on Discord: it is the part of the job no course teaches.

02 DEVELOPMENT WORK

Web developer — independent projects, Fondi, Italy — 2026 — present

- Multilingual brochure sites for local businesses: HTML, CSS and vanilla JavaScript, no frameworks and no third-party CDNs.
- GDPR compliance as part of delivery: cookie banners, privacy notices, forms with no intermediaries.

HTML / CSS / vanilla JS / GSAP / i18n / Netlify

Self-hosted automation — Ubuntu server and Docker — Ongoing

- Server run entirely from the command line: containers, encrypted remote access, backups and service monitoring.
- Scheduled Python automations process data through language models and deliver results over Telegram.

03 EXPERIENCE

Community Manager & Technical Support — Azienda BE, remote — Apr 2023 — Jan 2026

- Built and ran the team's Discord server from scratch, over 250 active members.
- Access verification, anti-spam, roles and automated ticketing through dedicated bots. First point of contact for users' technical issues.

Front-of-house & customer experience — Ristorante N'Dino and other venues — Jun 2021 — present

- Floor supervisor: direct guest and complaint handling through peak season, coordinating with the kitchen to keep service times. Fondi, Sperlonga and Terracina.

04 STACK

Front-end	HTML5, CSS3, vanilla JavaScript, GSAP, responsive layout, performance optimization
Tooling & deploy	Python, Git, GitHub, Docker, Ubuntu / Linux CLI, Netlify, GitHub Pages, REST APIs
AI & compliance	Language model APIs, Telegram and Discord bots, GDPR compliance for websites (cookie banners, notices, forms with no third parties)
Languages	Italian (native), English (technical reading and writing), Spanish (basic)
